In re: K252FL, Port Lavaca, TX  
BMPFT-20160407ABM  
Facility ID # 148446

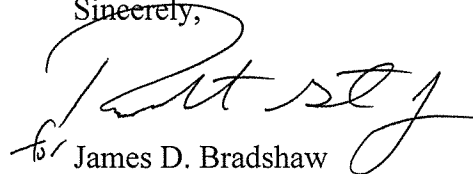

Dear Applicant:

This refers to the above-captioned application for a new FM translator proposed to serve Gilmer, Texas.

An engineering study of the application has revealed that it is in violation of 47 C.F.R. § 74.1231(b). Section 74.1231(b) of the Commission's Rules states that a translator may be used for the purpose of retransmitting the signals of a primary FM radio broadcast station or another translator station the signal of which is received directly through the space. The application proposes to rebroadcast KMPI(FM), McCoy, Texas. The distance between the sites of the primary station and translator is 192 kilometers. Because of the distance between the sites and the effective radiated power of the primary station, the staff has concluded that the proposed translator will not be able to receive the signal by "direct off-the-air". Thus, the application will be dismissed.

In light of the above, the application BMPFT-20160407ABM is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw  
Assistant Chief  
Audio Division  
Media Bureau
